Relationship for the Busy Student

# Database
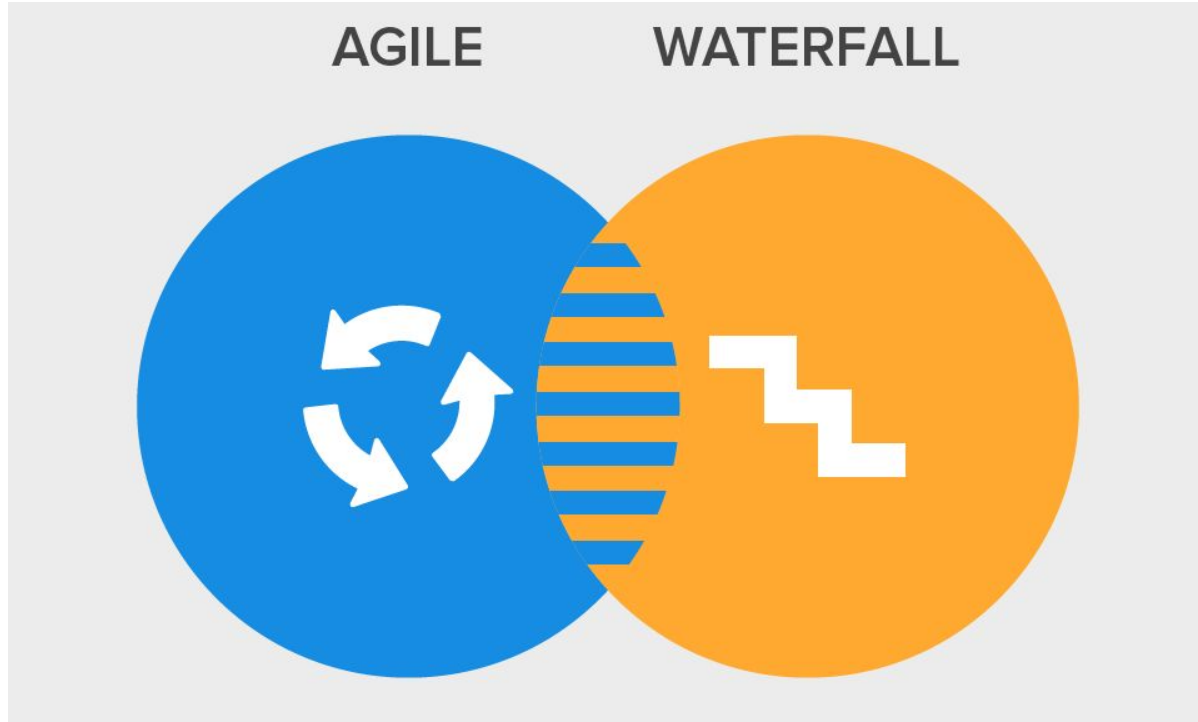

SQLITE3 for development

POSTGRESQL for production

4 elephants of 5. Good SQL databases.

Methodology

AGILE   WATERFALL
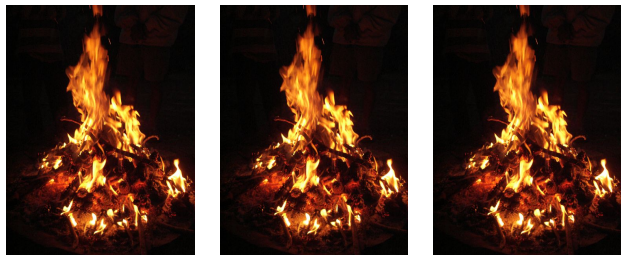

VCS Repository

Github

5.1 octocats out of 5. Incredibly
useful version control system

Project Tracker

Basecamp

3 campfires out of 5. Good program but group text worked better. Likely more useful on larger projects.
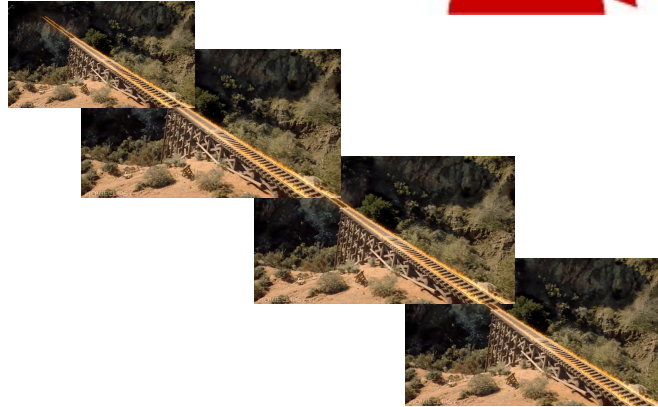

Frameworks

Ruby on Rails

4 rails out of 5

Rails is a very useful web development framework. A bit hard to get into initially.

Testing

Rails test helper

5 rails out of 5. Good test framework that can be used to write tests

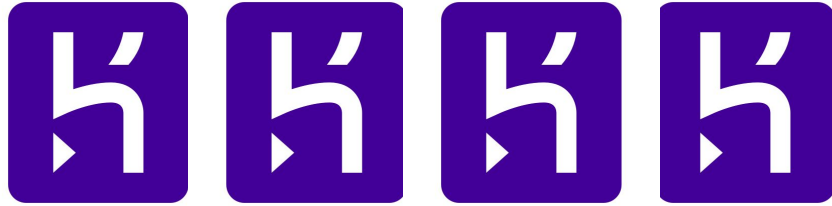

Auto Documentation

Yard

3 yards out of 5. Works well for ruby.
Not the best for Rails

Heroku

4 Herokus out of 5. Takes care of most of the work for you.

Challenges

- Rails
- API integration
- Scope
